

BE A VOICE FOR TEXAS!

Become a Land Stewardship Ambassador

The principles of land stewardship can be applied in both urban and rural settings. Students from diverse backgrounds can learn from and inspire one another to think critically about how we care for the land.

The goal of this program is to increase awareness of land stewardship principles, promote civic engagement in today's youth and inspire students to obtain careers that support land stewardship.

A cohort of 15 students will be selected in each of the following locations: Bexar, Webb and Cameron Counties. Open to all high school students.

Students who successfully complete the 10-session program will earn a \$400 stipend. Applications are due by December 1, 2020.

The application and more information may be found here:
